PROFILE

Motivated IT graduate with a strong interest in Data Science and Artificial Intelligence. Experienced in developing machine learning-based applications and mobile apps using Flutter. Currently completing two parallel remote internships in Data Science & Analytics. Passionate about building real-world solutions and eager to start a professional career in a growth-oriented organization.

EDUCATION

BS Information Technology

University of Sialkot | Graduated 2026

Intermediate (ICS)

Govt. Degree College Chobara | 2021

Matriculation (Science)

Govt. High School Chobara | 2019

Experience

Data Science & Analytics Intern

DevelopersHub Corporation

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on real-world datasets.
- Applied feature engineering and machine learning techniques for predictive analytics tasks.
- Conducted customer churn analysis and generated insights through data visualization.
- Developed analytical reports using Python, Pandas, NumPy, and Matplotlib.

Technical Skills

Programming Languages:

- Python
- C++
- Java
- Dart

Development:

- Flutter (Cross-platform mobile apps)
- Android Development (Java, XML)
- Web Development (HTML, CSS, JavaScript, PHP - Basic)

Databases:

- MySQL
- SQL Queries & Database Design

Machine Learning & AI

- Data Preprocessing & Feature Engineering
- ML Models (SVM, Random Forest etc.)
- Deep Learning Models: ANN, CNN, RNN.
- Explainable AI (XAI - Basic Understanding)
- Python Libraries (Pandas, NumPy, Matplotlib)

Tools & Technologies

- VS Code
- Android Studio
- Git & GitHub (Basic)
- Jupyter Notebook
- Google Colab
- FastAPI
- Postman

Projects

AI-Powered Diabetes Classification Application (Final Year Project)

- Developed an intelligent system for diabetes prediction & Classification using Machine Learning
- Applied SVM, KNN, Decision tree and Random Forest models for Prediction
- Applied Explainable AI (Lime Model) For Classification the Diabetes
- Performed data preprocessing, feature engineering, and evaluation
- Integrated AI model with application interface (Flutter/Dart)
- Project shortlisted by HEC for Expo

Machine Learning & Deep Learning Projects (Semester Work)

- Sports Ball Classification using CNN architectures (AlexNet, LeNet, VGG16 & VGG19)
- Student Stress and Depression Analysis using ML Models
- Academic Attendance Data Analysis using ML Models & Applied statistical measures
- Diabetes Prediction System using ML Models on Pima Indian dataset.

Mobile Application Development

- Developed Android apps using Java and XML
- Designed user-friendly interfaces and implemented core features

Web-Based Application

- Built responsive websites using HTML, CSS, JavaScript
- Implemented basic backend functionality

Core Concepts

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- Operating Systems
- Computer Networks
- Software Development Life Cycle (SDLC)
- Database Management Systems (DBMS)
- Database Administration (Basic Backup, Queries, Optimization)
- Information Security
- Cyber Security (Network Security, Basic Threat Analysis & Security Principles)
- Cloud Computing Fundamentals (IaaS, PaaS, SaaS)
- Virtual Systems & Services

Soft Skills

- Problem Solving
- Analytical Thinking
- Communication Skills
- Team Collaboration
- Time Management
- Adaptability

Certifications & Courses

Certificate of Appreciation (Skit Participation)

Data Analysis with Python

Languages

- English
- Urdu (Native)
